

2020 Overview of Curriculum Years 7 – 10

CREATING THE SCRIPT OF YOUR LIFE

2020 Overview of Curriculum Years 7 – 10

The broad curriculum at **Years 7 and 8** allows for the acquisition of essential knowledge and skills. Students undertake subjects from all learning areas of the Victoria Curriculum. Students study two languages in Year 7 (Japanese, Italian and French are offered) and one language in Year 8. The Outdoor Education camps in Years 7 and 8 focus on providing students with new challenges within a safe environment.

A unique component of the **Year 9** curriculum is Horizon, a program that provides multiple and extensive opportunities for students and the College to engage with the wider community through inquiry-based learning, community engagement activities and 'trail' days. All Year 9 students are involved in this program for a full term, on a rotational basis.

At **Years 9 and 10**, students are developing mastery of skills for independent learning and they make choices in some of the subjects they study. In Year 9, the core curriculum includes Religious Education, English, Mathematics, Science, Humanities, Languages (French, Italian or Japanese) and Health and Physical Education. The optional studies include Graphic Design, Music, Humanities, Mathematics, Drama, Dance, Visual Art, Food Technology, Textiles, Information Technology and Media.

The **Year 10 curriculum** enables increased student choices including the opportunity to accelerate and commence a Victorian Certificate of Education (VCE) unit of study. Vocational Education and Training (VET) units are also available for students who wish to pursue areas of vocational interest as part of their senior program. All students in Year 10 undertake Religious Education, English, Mathematics, Science, Civics and Health and Physical Education. There are choices in the subject selections in Mathematics and Science. Students participate in Structured Work Placement or Work Experience if they are studying VET subjects.

Across Years 7-10 students will learn and develop their understanding of the **capabilities**. The capabilities are taught within subjects. The four capabilities are *Critical and Creative Thinking, Ethical, Intercultural and Personal and Social*. While these capabilities are taught across many subjects, in the subject overviews you will find the capabilities listed only where they are being assessed in that subject.

In Years 7 to 9, the Rosetta Program provides support to those students who are identified with literacy needs. The students in this program do not undertake Language units. Enrolment in this program is through invitation and consultation.

On the following pages you will find a broad overview of each Year Level curriculum together with an indication of the Common Assessment Tasks within each subject. Different classes may be at different stages in their units over the term but will all complete the Common Assessment Tasks that are outlined in this document.

Further information pertaining to Years 9 and 10 subject selection can be found in the relevant Handbooks on the College Website under the Learning@OLMC tab.

Year 7 and 8 Curriculum Overview

Years 7 - 10 Curriculum Overview 2020

In Years 7 and 8, students at OLMC have the opportunity to develop skills, knowledge and understanding across a range of subject areas.

The Victorian Curriculum, from which our curriculum is derived, reflects particular Victorian priorities and approaches to teaching and learning. This framework for curriculum delivery embeds the capabilities within classroom learning experiences. The cross-curriculum priorities provide a lens for delivering content with a focus on contemporary issues in the Australian community. At present, these priorities are sustainability, Australia's engagement with Asia, and Aboriginal and Torres Strait Islander history and culture.

All Learning Areas have core subjects in Years 7 and 8. Religious Education, English, Mathematics, Science, Health & Physical Education and Humanities are year-long subjects, whilst Languages and Performing Arts are semester length units. Students are involved in Design Arts Technology subjects for the full year.

A broad range of subjects is offered so that students can deepen their understanding of different subjects and the associated skills required to successfully learn knowledge and understanding. This will assist students to identify their strengths and interests and to engage with new areas of study that may not have been available in the primary school. It is also important for them to be exposed to a range of subjects so that they are able to make informed decisions about subject selection for the senior years and future pathways.

In Year 7, most classes are conducted within the Pastoral Group. Students move into different class groupings for the study of their Language electives. The Rosetta Program runs during these lessons. Changing class groupings also gives students the opportunity to mix with a wider range of the Year Level cohort.

The Pastoral program runs as part of Student Wellbeing. Each morning, girls have a 15 minute pastoral time with their Pastoral Leader at the commencement of the day. On Wednesday morning students are expected to bring a book to pastoral for DEAR – Drop Everything and Read. A Pastoral lesson is held once a fortnight. This lesson may include programs such as raising awareness of cyber bullying, friendship and other social issues; be an opportunity for broader participation in Year level or House activities or Assemblies.

Years 7 - 10 Curriculum Overview 2020

Year 9 Curriculum Overview

Our Lady of Mercy College offers a diverse and dynamic range of opportunities for students in Year 9. In the middle years, students are educated in a supportive learning environment where they are encouraged to take risks, enjoy challenges and become responsible independent learners. Students are encouraged to analyse and engage with the world around them, to create knowledge and master skills for lifelong learning.

Year 9 students are in the final year of their middle schooling and on the threshold of their senior years at school. In Years 9 and 10, students are offered a range of opportunities and are expected to take greater responsibility for their learning. There is a range of electives in the different Learning Areas so that students have the opportunity to explore new learning and also consolidate skills and knowledge in areas of interest or particular skill.

Year 9 Horizon Program

A key aspect of the curriculum for Year 9 students is Horizon. Horizon is a term-based program that offers students rich learning opportunities within the community. Horizon is a mix of explicit cross-curricular teaching, inquiry based learning and activities based within the school and the Heidelberg Community.

Each term two Pastoral Groups will join Horizon at times when they would otherwise have Mathematics, Religious Education, English, Humanities, Science and Physical Education. In Horizon the curriculum draws on knowledge and skills from the above core subjects. For example from the Maths curriculum students learn about types of income, superannuation, taxation and compound interest. During the Horizon term students will still attend their Pastoral Group, Pastoral lessons, elective subject options and whole school activities, such as the Swimming and Athletics Carnivals and Mercy Day.

The aim of Horizon is to encourage students to feel connected with their community, to promote independent learning, develop thinking and reflection skills and to provide the opportunity for rich learning within the broader community. The program is focused on improving student engagement with their learning, by investigating a concept, such as justice, and making links between what occurs in the classroom and its application in the wider community. In the Justice unit they look at the role science plays in the justice system. Students also visit Court on one of the weekly Trail Days in the community, to connect their understanding of justice to what justice looks like in our society.

OLMC is indeed fortunate to be learning in such a rich and vibrant community as Heidelberg. While there is much to learn in the community, there is also a great deal students can give. As part of Horizon, students undertake community engagement where they are involved in service to the community, and this forms an important aspect of Faith in Action. For example, students in 2019 have been involved in working with patients at Mercy Hospital and with the local radio station.

Learning to take risks and being challenged is part of the Outdoor Education component of Horizon. Students will spend four sessions per term engaged in a range of outdoor activities such as rock climbing and bike riding. Students also attend a camp as part of Horizon.

The culmination of Horizon is the presentation of the Inquiry Based Project to their peers, parents and the Horizon teachers at the end of term.

More information about Horizon can be found on the OLMC Website.

Years 7 - 10 Curriculum Overview 2020

Year 10 Curriculum Overview

Students in Year 10 are part of the vertical house structure and will be in the same Pastoral Group for Years 10 to 12. Curriculum studies are not based on Pastoral Groups, so students will interact with a wide range of students across their year level throughout the year.

In Year 10, Victorian Curriculum units and courses form the basis of our curriculum. Studies in all Learning Areas are not compulsory at Year 10. As part of the Victorian Curriculum, all students must study Religious Education, English, Science and Mathematics and have the opportunity to study History at this level. Students may select to study across the Arts, Technology, Humanities, Languages and Health & Physical Education Learning Areas, as well as choose from electives in Science, English and Mathematics in addition to the core subjects. As part of Year 10, students will undertake end of semester exams.

It is recognised that some students who are embarking on a particular study pathway may not have the opportunity to include History in their subject selection at Year 10, though a choice from the Humanities Learning Area is highly recommended. At this level, students are beginning to see where their interests lie for future studies at VCE (Victorian Certificate of Education) level, and some will make subject selections with a good understanding of the subjects they are likely to undertake in VCE and future study pathways beyond secondary schools.

Many students will still be exploring their areas of interest and expertise. For this reason, a number of semester length units operate across the year to enable students the opportunity to have breadth in their subject choices. A range of VCE Unit 1 and 2 subjects are offered as semester units, again so that students still have the opportunity to try a variety of subjects. VET (Vocational Education and Training) subjects are also available to students. These are run at OLMC so that students do not have to travel to other venues to access these subjects. VET studies are year-long and are also an acceleration, being the equivalent of a Unit 1 and 2 study. VET subjects offer students an insight to different ways of learning and course delivery, being competency based.

VCE or Enhanced Studies

Students may select to do one VCE unit or an enhanced study in Year 10 (also considered an accelerated study); this can open a pathway to completion of a VCE Units 3 and 4 studies in Year 11. Enrolment in an accelerated study is not automatic and students must apply for selection into these subjects.

Careers and Pathways

Students and parents will have the opportunity to meet with the Careers Coordinator and should be active in thinking about their pathway in the senior years of schooling; this may include the Victorian Certificate in Applied Learning (VCAL) in Years 11 and 12. Over the year, there will be opportunities to engage in work or career experience, to visit tertiary institutions and learn about the different courses and career options available to students.

Years 7 - 10 Curriculum Overview 2020

Year 7 Course Outlines				
Domain	Semester	Overview	Semester Units	Assessment Tasks
YEAR 7 Design Arts Technology	1 and 2	The focus of the Creative Arts course is to develop each student's ability to explore, create and respond to different art forms and to develop their creativity and practical skills. They reflect on their own work and respond to the work of others, including their peers. <i>Critical and Creative Thinking Capability</i>	Creative Arts <ul style="list-style-type: none"> Trials of materials and techniques Folio of work 	Folio of practical tasks and workbook annotations Development of an artwork
		In Digitech, students explain how text, image and sound data can be represented and secured in digital systems and presented using digital systems. They analyse and evaluate data from a range of sources to model solutions and create information. They manage the collaborative creation of interactive ideas, information and projects and use appropriate codes of conduct when communicating online.	Digitech <ul style="list-style-type: none"> Digital systems Data and technology Computational thinking 	Progress Assessment of skills and knowledge developed from various class activities
		Students define and decompose problems in terms of functional requirements and constraints. They design user experiences and algorithms incorporating branching and iterations, and develop, test, and modify digital solutions. Students evaluate information systems and their solutions in terms of meeting needs, innovation and sustainability.		Development of an online game or animation using block coding software
YEAR 7 English	1 and 2	English helps students to communicate effectively through writing, reading, speaking and listening. Students learn about audience, purpose, situation and culture and respond to a range of texts in print, visual, electronic and multimodal formats that explore familiar and challenging ideas and themes. <i>Ethical Capability</i>	<ul style="list-style-type: none"> Persuasive writing Poetry Analysis Film as text Imaginative Essay Analytical Essay Oral 	Persuasive Essay

Years 7 - 10 Curriculum Overview 2020

		<p>study of the changes associated with adolescence by identifying what changes (physical, social and emotional) they can expect to experience. They describe the influence of family and society on shaping personal identity and values.</p> <p>In developing strategies to minimise harm and to protect their own and others' health, students consider health resources, products and services associated with the use of tobacco and alcohol.</p> <p>Students develop and refine a range of movement and manipulative skills through their participation in a range of individual and team based activities. They engage in activities which develop strategic thinking and tactical knowledge and are encouraged to take on a variety of roles in team games (e.g. player, coach and umpire). Examples of activities that students will participate in include: athletics, netball, basketball, hockey, soccer, gymnastics, volleyball, softball, lacrosse and badminton.</p> <p><i>Personal and Social Capability.</i></p>		<p>Observation of performance during physical activity classes (Sem 1)</p> <p>Identity Box task</p> <p>Observation of performance during physical activity classes (Sem 2)</p> <p>Smoking & Alcohol Test</p>
YEAR 7 Humanities	1 and 2	<p>Humanities are the study of human societies and environments, people and cultures.</p> <p>Geography examines both physical and human geography topics and builds students' understanding of our place in the environment and our influence of it.</p> <p>History examines ancient civilisations and provides students with the knowledge and skills to understand their own world.</p> <p>Civics and Citizenship explores the role of democracy in building the nation of Australia. Key values like freedom of speech and the rights of individuals will be examined as the basis for forming a parliamentary democracy found within Australia.</p> <p>Students will learn about how values shape Australian identity and what constitutes a good citizen. They will explore how Parliament works, the roles of the two houses of Parliament and contribution of political parties to this system. They will also examine how voting work within the Australian system.</p> <p>Skill development will focus on analysing the impact of democracy on our society, discussing how issues can be addressed through the Parliamentary system and presenting and discussing points of view in understanding current community issues.</p>	<p>Geography</p> <ul style="list-style-type: none"> Place & Liveability Water in the World 	<p>Field Trip Report</p> <p>Project</p>

YEAR 8 Health and Physical Education	1 and 2	Students consider the relationship between physical activity, fitness and health, and explore ways to measure their own fitness and physical activity levels. They investigate and address positive and negative motivational factors that influence the value they place on physical activity. Students describe the health needs of young people. They learn how to access reliable information about health issues affecting them and to identify barriers and enablers to accessing health services. Students extend their learning about establishing personal identity. They describe social and cultural factors influencing the development of personal identity and discuss the physical, emotional and social changes that occur as a result of the adolescent stage of the lifespan.	<ul style="list-style-type: none"> • Exploring Australia's Health • Our mind, Our body • First Aid • Inquiry • Mental Health 	Exploring Australia's Health Test
				Observation of performance during physical activity classes (Semester 1)
				First Aid practical test and presentation

Years 7 - 10 Curriculum Overview 2020

		<p>Students explore the prevalence of mental health issues in Australia and identify strategies to enhance mental health and wellbeing.</p> <p>They identify risks associated with outdoor activities based on their camp experience. They learn basic first aid skills and management.</p> <p>Students participate in a variety of team and individual games and activities, using and building on skills and strategies from other sports as well as continuing to develop new, sport-specific skills. Examples of activities students may participate in include: athletics, cricket, volleyball, AFL Ultimate, Frisbee, bike riding, gymnastics and touch football. Students are encouraged to undertake a variety of roles in team games and to reflect on their personal and social behaviours in physical activity settings.</p> <p><i>Personal and Social Capability</i></p>		<p>Erin Deering Podcast Test</p> <p>Inquiry presentation</p> <p>Observation of performance during physical activity classes (Semester 2)</p>
YEAR 8 Humanities	1	<p>In Geography students explore the physical landscape and the impact of human activities on environments and places.</p> <p>In Economics students consider the role of the economy in Australian society and how the economy operates at their world level.</p> <p><i>Intercultural Capability</i></p>	<ul style="list-style-type: none"> Economics and Business Landform and landscape 	<p>Group Oral Task</p> <p>Field Trip Report</p>
	2	<p>In History students study people and places in Medieval times in both Asian and European societies. They explore how these societies have changed over time and the influence of particular events on the development of societies.</p>	<ul style="list-style-type: none"> Medieval Europe Renaissance Italy 	<p>Research Essay</p> <p>Inquiry Task</p>
	2	<p>In Civics students study how laws are made and how they protect the rights of individuals in society.</p> <p><i>Critical and Creative Thinking Capability</i></p>	<ul style="list-style-type: none"> Civics - Individuals & Law Rights and responsibilities 	<p>Test</p>
YEAR 8 Languages	1 and 2	<p>Three languages are offered in Year 8, of which students study one language for the entire year. The course of study will cover the four main areas of language acquisition: reading, writing, speaking and listening.</p> <p>The units are structured to encourage confidence in speaking and to gain an understanding of the culture of the different countries from which the languages originate.</p> <p><i>Intercultural Capability</i></p>	<p>Italian</p> <ul style="list-style-type: none"> Leisure activities, pastimes and interests My identity and that of others Countries and nationalities Getting around in Italy and Australia Eating and drinking Italian currency Analysing cultural practices 	<p>Comprehension: Reading</p>

Years 7 - 10 Curriculum Overview 2020

Year 9 Course Outlines				
Domain	Semester	Overview	Semester Units	Assessment Tasks
YEAR 9 Design Arts and Technology	One semester elective	<p>Art</p> <p>Paints and Pixels is a subject that focuses on experimenting with a range of modern materials, techniques and ideas. There is a focus on using digital media to enhance the art making process. Students gain ideas and inspiration from various sources including social media. This course will open a student's creative mind to current practice and trends in the art world.</p>	<ul style="list-style-type: none"> • Drawing and research activities • Painting 	<p>Progress skills evaluation</p>
		<p>Food Studies</p> <p>Food Studies enables students to build on their practical skills and knowledge of ingredients in the kitchen. Through cooking and eating, students discover many ways to prepare and creatively present a range of recipes. They are given the opportunity to design and create their own meals. They learn to eat well for the future, gaining insight into social and cultural norms that surround the world of food.</p>	<ul style="list-style-type: none"> • Use a range of tools and processes • Use foods, tools and equipment safely • Analyse processes and products • Adapt recipes for specific needs • Use and store food safely • Choose and prepare food suitable for specific situations 	<p>Practical assessment: production skills</p>
		<p>Active Graphics</p> <p>The art of visual communication and graphics involves the use of creative thinking and practical skills to present an idea. Students will discover how designers attract customers and inspire them to buy products. They will learn how to communicate through the use of branding and logos. This subject uses the elements of design to engage and communicate. Students will have the opportunity to plan and design like a graphic artist. This course will show you how to think like a graphic designer.</p>	<ul style="list-style-type: none"> • Design Solutions • Design Elements • Illustrator • Branding • Environmental Design 	<p>Design Elements</p>
		<p>IT Bits and Bytes</p> <p>The use of information technology crosses all learning areas and the focus of this unit is to increase student awareness and knowledge of appropriate procedures, equipment (hardware/software), formats, conventions and the social implications which apply to the study of</p>	<ul style="list-style-type: none"> • Manipulate images using Photoshop • Create a website using Dreamweaver • Discuss good web design 	<p>Computer awareness investigation</p>

		<p>IT. This computer based course aims to develop students' interest in the general use of IT in the world around them.</p> <p>Students are made aware of procedures for saving and presenting work, which can be applied to other subjects. Students are made aware (develop an understanding) of the implications of the use of ICT and the social responsibilities as users of technology.</p>	<ul style="list-style-type: none"> Discuss issues related to the Internet 	Design Task
		<p>Media: The Media and Me</p> <p>The Media and Me looks at a variety of media representations of teenagers in television and film. It also looks at how characters and narratives are constructed to engage teenage audiences.</p>	<ul style="list-style-type: none"> Basics of Photoshop and Premiere Pro editing software. This software is the industry standard and a solid foundation for media, arts and world of design. 	Still Image Production Film Analysis
		<p>Textiles: Contemporary Textiles</p> <p>This subject is for students who love exploring creative ways of interpreting fashion and design. This subject provides opportunities for students to research, design and create their own piece of wearable art. This course introduces the design process to the students. It is perfect for the creative brain as it allows students to develop ideas, trial materials and processes, gain technical knowledge and fashion illustration techniques.</p>	<ul style="list-style-type: none"> Research, Trials, Design and Construction of a Wearable Art piece Fashion Illustration 	Progress Mark: Visual Diary Wearable Art Hat Fashion Illustration
YEAR 9 English	Three terms core	<p>Students will engage with a variety of texts for enjoyment. They will interpret, create, evaluate, discuss and perform a wide range of literary texts, as well as texts designed to inform and persuade. These include film and digital texts, fiction, nonfiction, poetry, dramatic performances and multimodal texts; literary texts that support and extend students in Levels 9 and 10 as independent readers are drawn from a range of genres and involve complex structures. These texts explore themes of human experience and cultural significance, interpersonal relationships, and ethical and global dilemmas within real world and fictional settings.</p> <p>Students will develop a critical understanding of the contemporary media. They will create a range of imaginative, informative and persuasive types of texts including narratives, performances, reports, discussions, literary analyses, transformations of texts and reviews.</p> <p><i>Intercultural Capability</i></p>	<ul style="list-style-type: none"> Short Story Unit – close analysis and essay response Text study comparison Shakespeare Analysis 	Creative writing in response to short stories comparative task

Years 7 - 10 Curriculum Overview 2020

YEAR 9 Health and Physical Education	Three terms core	<p>Movement and physical activity: through the study of Physical Education, students are encouraged to develop proficiency in performing complex movement and manipulative skills in a wide variety of activities that may include: ultimate frisbee, net sports and invasion games, self-defence, SEPEP (netball) and Design a Game. Students also complete fitness testing and design a fitness program to address particular components. The design of the program is structured to enable students to maintain regular participation in moderate to vigorous physical activity and students are provided with the opportunity to analyse and evaluate their level of involvement in physical activity.</p> <p>Personal, Social and Community Health: The Health Education program is structured to enable students to consolidate their understanding of the physical, emotional and social changes that occur as a result of the adolescent stage of the lifespan and the factors that influence their own development. Authentic learning experiences will provide students with the opportunity to analyse social and cultural factors that influence the formation of one's identity and values.</p> <p><i>Personal and Social Capability</i></p>	<p>Movement and Physical Activity Students are supported to develop the capacity to combine motor skills, strategic thinking and tactical knowledge to improve individual and team performance.</p> <p>Personal, Social and Community Health Students will focus on the factors that contribute to their identity. Students identify components of fitness and various training techniques. Students apply this when developing their own fitness program based on goals they have identified for themselves. Students explore decision making relating to various relationships that can occur during the youth stage of development. Students identify various legal and illegal drugs that are prevalent in society. Students explore factors that contribute to an individual's decision regarding drugs.</p>	Identity Task
		Observation of performance during physical education classes		
		Design A Game Practical Task		
		Training program Assessment Task		
		Video Analysis Reflection Task		
YEAR 9 Horizon	One term	<p>Horizon is a term-based program that offers students rich learning opportunities within the community. Horizon is a mix of explicit cross-curricular teaching, inquiry-based learning, and activities based within the school and wider community. See more detailed description earlier in the document or in the Horizon handbook.</p> <p><i>Critical and Creative Thinking, Ethical, Personal and Social Capability</i></p>	<p>The Inquiry-Based Learning project is a term-based research project based on one of our key themes for the term:</p> <ul style="list-style-type: none"> • Community • Justice • Environment 	Beyond the Baggot Inquiry
		Environmental Challenge Campaign		
		MyLife@25: Financial Portfolio		
		Contemporary ethical thinking chart		
		Pathway Exploration, digital and financial literacy		
		Inquiry-Based Learning project including three assessments throughout the term		
YEAR 9 Humanities	Three terms core	<p>History: Battle for Australian Identity: 1890 to 1918 An investigation of how economic and social forces were helping to shape the Australian identity around the time of Federation. The influence of WW1 on the emerging Australian identity</p> <p><i>Critical and Creative Thinking Capability</i></p>	A portfolio of assessments	Document Analysis
		Extended written response		
		Individual research project		

Years 7 - 10 Curriculum Overview 2020

	One term of each study	Economics and Business Work and Work futures. An investigation of how technology and societal attitudes are changing the nature and patterns of work. Applying enterprising skills to imagine new ways of working and to build a personal brand.	A portfolio of assessments <ul style="list-style-type: none"> Newspaper page on technology change Personal business Card: building a competitive advantage & brand Business in a Bag (group task) applying entrepreneurial skills 	Report - Marketing Research Task – The Producer

				Production: Writing
Year 9 Mathematics	Three terms core	The Mathematics course in Year 9 in both groupings continues to build on the concepts learned in Year 7 & 8. All students will cover the same topics. However, for General Mathematics there will be greater emphasis on using the CAS calculator and summary notes for assessment. <i>Critical and Creative Thinking Capability</i>	At Year 9, there are two Mathematics groupings: Mainstream Mathematics or General Mathematics. In each of these classes, the content studied is the same but will be appropriate to the students' progress of learning in that class. Each student will use a TI-Nspire CX CAS calculator as part of their mathematical learning. Number and Algebra: Arithmetic computations and applications to financial arithmetic. Rearranging and simplifying algebraic expressions. Sketching linear relationships and simple non-linear relations. Measurement and Geometry: Area of composite shapes, surface area and volume. Application of Pythagoras' Theorem and the trigonometric ratios. Use of ratio and scale factors in similar figures. Statistics and Probability: Probabilities of events. Represent data appropriately for statistical analysis.	Order of assessment tasks will be different depending upon Horizon Programs
				Pythagoras and trigonometry applications task
				Linear relationships test
				Geometry test
				Indices test
				Expanding and factorising algebraic expressions test
				Measurement application task
				Quadratic relations test
				Probability application task

Years 7 - 10 Curriculum Overview 2020

	One semester elective	<p>Brainstretching: This subject is designed for students who enjoy and are willing to persevere with worded problems. They will work independently and in groups on a variety of tasks with a mathematical basis. This course aims to extend and challenge students' thinking and problem-solving skills.</p> <p><i>Critical and Creative Thinking Capability</i></p>	<ul style="list-style-type: none"> Activities involve developing strategies for solving problems, lateral thinking, and communicating procedures to others in the group. 	Problem solving applications Task 1
				Problem solving applications Task 2
YEAR 9 Performing Arts	One semester electives	<p>Dance: Just Dance Students learn appropriate safe dance practise through development of their own technique in a variety of dance styles. They apply this knowledge when participating in structured improvisations and choreographic workshops. Students explore and express their own dance style in the development of a performance piece to an audience. Students learn the importance of feedback to enhance the overall performance.</p> <p>Students develop the ability to observe, analyse and evaluate their own and other's dance works with the focus on a particular style selected from the student's own interests. Students observe a professional dance performance and critique the choreographer's intentions. They learn to discuss and write analytically, developing the understanding to use dance terminology accurately.</p>	<ul style="list-style-type: none"> Safe dance practice Choreographic workshops Dance-making processes Observation, reflection and analysis of own and others dance works 	Warm Up and Cool Down Task
		<p>Drama: Dare to be Dramatic Students work in teams to research ideas for Drama. They observe, analyse and discuss their own performances and that of their peers, using drama terminology.</p> <p>Students learn about the fundamental elements of performance, including exaggerated and stylised movement, mime, disjointed time sequences and transformation of character, object, time and place. They also create their own self-devised ensemble performances and experiment with stagecraft elements.</p>	<ul style="list-style-type: none"> Team building Dramatic elements Expressive skills Play-making techniques Performance skills Performance styles 	Group Learnt Work Performance
		<p>Music – Performance Students will develop performance strategies and skills to enable them to perform to a small audience. They will have the opportunity to perform as a soloist and as a member of a group developing their rehearsal</p>	<ul style="list-style-type: none"> Music for an occasion Solo and group performance Music essentials for performers Musicianship Music analysis 	Group Composition Performance

		<p>techniques and ability to perform in an authentic style in relation to their performance choices.</p> <p>Students will have the opportunity to listen to and to analyse music from a range of styles.</p> <p>They will focus on how the artist reaches its intended audience and how they might be able to incorporate these techniques in to their own performances.</p>		<p>Musicianship Test</p>
		<p>Music Technology</p> <p>Students develop their knowledge of a range of sound systems which can be used in performance, studio recording and production. They will develop practical skills in connecting the different pieces of equipment. Students will develop the knowledge to make decisions about the appropriateness of the equipment for particular events and ensembles. Students will learn the basics of recording music and distribution on various platforms.</p>	<ul style="list-style-type: none"> • Planning for an Event • Audacity • Recording Techniques • Podcasting 	<p>Design/plan recording studio set up for different ensembles.</p> <p>Podcasting</p>
<p>YEAR 9 Religious Education</p>	<p>Three terms core</p>	<p>Scripture and Jesus: students work towards gaining an understanding of the Literary Forms in the Scriptures; in particular, Prophets of the Old Testament. Students develop an appreciation of the breadth and nature of the Scriptures and the variety of literary styles.</p> <p>God, Religion and Life: students explore Redemption and Hope and respond to images about good and evil in music, media and film.</p> <p>Students focus on Mary as the first and most loyal disciple of Jesus. They will investigate her early life. Church teachings and her impact on modern society.</p>	<ul style="list-style-type: none"> • Scripture and Jesus • God Religion and Life • Prayer, Liturgy and Sacraments • Church and Community 	<p>The dates for Year 9 RE assessments vary depending on the timing of the Horizon Program for each class.</p>
				<p>Images of Good and Evil Oral Presentation</p>
				<p>Biblical and Modern Day Prophets Research Task/Analysis</p>
				<p>Mary Essay</p>
<p>YEAR 9 Science</p>	<p>Three terms core</p>	<p>Students study how the nervous and endocrine systems control the functioning of the human body. They investigate how magnets are used in the generation of electricity and the operation of motors. They explore the diversity of the Universe, its formation and make-up, in a broad astronomy unit. They study different types of chemical reactions and how these are used to advantage in our society.</p> <p>Students design and conduct scientific investigations in ways that lead to the collection, interpretation and presentation of valid data. They look at how science is applied in the world around them.</p>	<ul style="list-style-type: none"> • Nervous and endocrine systems • Electromagnetism • Astronomy • Chemical reactions 	<p>Topic Tests</p>

Years 7 - 10 Curriculum Overview 2020

	One semester elective	<p>Literature</p> <p>On completion of the unit students should be able to:</p> <ul style="list-style-type: none"> Identify structures and features of a range of spoken texts presenting complex themes and issues. Analyse critically the relationship between texts, contexts, speakers and listeners. Read a range of texts to discuss different perspectives on complex themes and issues. Develop and justify detailed interpretations of texts. Evaluate characteristics that define an author's individual style. Create imaginative texts that make relevant thematic and intertextual connections with other texts. 	Semester 2 Students will study 'classic' literary works	<p>Passage analysis</p> <p>Oral presentation</p> <p>Literary Perspectives Essay</p>
<p>YEAR 10 Health and Physical Education</p>	<p>Core Choice of one semester subject from four options elective</p>	<p>Movement and physical activity</p> <p>This elective is designed to engage students through movement. During this elective the link between physical activity and health and wellbeing will be reinforced. Students will raise their awareness of the barriers to physical activity and the factors that promote an increase in physical activity levels. Students will also identify what cultural factors are at play when an individual makes choices around physical activity levels. The current health status of Australia's youth is explored.</p> <p>During practical lessons students will perform and refine movement skills in a variety of team and individual sports which may include indigenous games, invasion games, racquet sports, SEPEP volleyball, dance and games designed by students themselves. Practical classes will also provide opportunities to give feedback to develop leadership and collaboration skills.</p>	<p>Movement and physical activity</p> <ul style="list-style-type: none"> Health status of Australia's Youth Analysis of a variety of individual and team based sports Enabling factors and barriers that relate to physical activity Global culture and ethics in sport 	<p>Observation of performance in practical activities</p> <p>Game presentation and written report</p> <p>Sport culture group presentation</p>
		<p>Health in Our Community</p> <p>This elective is designed to develop a deeper understanding of the concepts of health and wellbeing by focusing on the case of a mother and her baby. Students have access to a virtual baby during the elective to help achieve this outcome. Students will analyse and critique factors that impact on the health of a mother and baby in both a local and global context. Students will develop their understanding of</p>	<p>Health knowledge and promotion</p> <ul style="list-style-type: none"> Dimensions of health and wellbeing Health status indicators Protective factors and risk factors for health Australia's health system 	<p>Health and wellbeing test</p> <p>Research task on a developing country</p>

Years 7 - 10 Curriculum Overview 2020

		<p>how physical environment, social environment and behaviours all impact on the health status of an individual. Students will also participate in physical activities that can be continued in the middle and late stages of adulthood.</p>	<ul style="list-style-type: none"> Maternal health services <p>Maternal health in a global setting</p>	<p>Reflection on virtual baby experience (2 weeks after care of virtual baby)</p>
		<p>Sports Coaching and Event Management (VET Taster)</p> <p>Sports Coaching and Event Management is a course designed to explore the variety of skills required to take on the role of coach and how they could be applied in our local community. Students will have the opportunity to develop skills they required in the Sports Education in Physical Education Program. Students will raise their awareness of the qualities of a good coach and traditional coaching styles. Emphasis will also be placed on organisational skills, time management and effective communication techniques. These skills will be applied in a sport setting but the way in which they can be transferred to other aspects of the student's life will also be highlighted. Sports Coaching and Event Management also provides a "taster" for those students interested in the VET Sport and Recreation course.</p>	<p>Units of Competence</p> <ul style="list-style-type: none"> Qualities and skills required of a coach Coaching styles <p>Elements required for event management</p>	<p>Observation of performance in practical activities</p>

Representative Democracy – Test</p> <p>Elective units: test /short answers questions</p>
	One Semester Elective	<p>Commerce</p> <p>Throughout this unit students will analyse current economic issues affecting Australia. They will explore economic issues such as unemployment, inflation, global trade and economic growth. An examination of the role key stakeholders play in the economy will be undertaken; including the role of individuals, business groups and the government.</p> <p>They will also study the concept of entrepreneurship and factors involved in establishing a successful small business.</p> <p><i>Critical and Creative Thinking Capability</i></p>	<ul style="list-style-type: none"> • The Australian economy • Business and its environment 	<p>Business cycle poster</p> <p>Economic living standard test</p> <p>Report on house prices</p>
		<p>History: World War II</p> <p>Students investigate wartime experiences through a study of World War II. This includes a study of the causes, events, outcome and broader impact of the conflict as an episode in world history. An examination of war in Europe and the Pacific will be undertaken. The impact this conflict had on Australian society will also be explored.</p> <p><i>Critical and Creative Thinking Capability</i></p>	<ul style="list-style-type: none"> • World War II <p>The overriding ideas explored are; evidence, continuity and change, cause and effect, perspectives, empathy, significance and contestability.</p>	<p>Document analysis</p> <p>Essay</p> <p>Oral presentation</p>
YEAR 10 Languages		Whole Year Elective	<p>French</p> <p>The aim of this course is to build confidence and competence in reading, writing, listening and speaking in French within the world of teenage experience. Topics studied include Paris, holidays, environment, history and work.</p>	<ul style="list-style-type: none"> • Tourism • Food • History • Environment • Education and career choices

Years 7 - 10 Curriculum Overview 2020

	<p>On completion of the unit, students should be able to:</p> <ul style="list-style-type: none"> • Demonstrate comprehension of main ideas in a range of listening tasks; • Communicate ideas orally in a range of situations, including poetry and conversation • Demonstrate comprehension of main ideas contained in a range of written texts; and • Convey ideas and opinions through a variety of written tasks, such as email, letter and diary entry. • Analyse cultural practices <p><i>Intercultural Capability</i></p>	<ul style="list-style-type: none"> • Direct/indirect object pronouns • Imperfect tense • Imperative • Adverbs • Pronouns – indefinite and relative • Partitive article • Future tense • 'si' clauses • Conditional mood • Comparative/superlative 	Production: Writing
			Comprehension: Reading and Listening
			Production: Writing and Speaking
			Language Acquisition: Grammar Test
	<p>Italian</p> <p>The aim of this course is to build confidence and competence in reading, writing, listening and speaking in Italian within the world of teenage experience. Topics studied include a comparison of the school systems, hobbies, leisure activities, holidays, sports and work. Students are also provided with appreciation of culture and society through various activities and through the use of technology.</p> <p>On completion of the unit, students should be able to:</p> <ul style="list-style-type: none"> • Demonstrate comprehension of main ideas in a range of listening tasks; • Communicate ideas orally in a range of situations including poetry, conversation and monologue; • Demonstrate comprehension of main ideas contained in a range of written texts; and • Convey ideas and opinions through a variety of written tasks such as e-mail, letter or diary entry. • Analyse cultural practices <p><i>Intercultural Capability</i></p>	<ul style="list-style-type: none"> • Holidays/travel • Relationships • Personal qualities • Environment • Technology • Imperfect tense • Future tense • School/work/careers • Imperative • Direct/indirect object pronouns 	Production: Writing
			Language Acquisition: Grammar and Vocabulary Tests
			Comprehension: Reading
			Production: Speaking
			Comprehension: Listening
			Language Acquisition: Grammar and Vocabulary
	<p>Japanese</p> <p>The aim of this course is to broaden students' vocabulary and active use of grammar to allow them to freely express themselves in Japanese. A focus on oral skills aims to increase students' confidence and competence in speaking. Students understand and use Japanese within the context of topics relevant to teenagers. Through cultural activities students also gain an appreciation of Japanese culture, history and society.</p> <p>On completion of this unit students should be able to:</p>	<ul style="list-style-type: none"> • My house • The Japanese neighbourhood • Seasons and weather • Plain form (casual speech) • Schooling • Restaurants and Shopping • Going on Exchange 	Language Acquisition
			Production: Speaking
Comprehension: Listening and Reading			

Years 7 - 10 Curriculum Overview 2020

		<ul style="list-style-type: none"> • Demonstrate comprehension of main ideas in a range of listening tasks; • Communicate ideas orally in a range of situations, including conversation and monologue; • Demonstrate comprehension of main ideas contained in a range of written texts; and • Convey ideas and opinions through a variety of written tasks such as a letter, speech, script or diary entry. • Analyse cultural practices <p><i>Intercultural Capability</i></p>		Comprehension: Listening and Reading
				Production: Writing
				Language Acquisition Test
YEAR 10 Mathematics	Whole year core	<p>Year 10 General Mathematics</p> <ul style="list-style-type: none"> • Number and Algebra: Solving linear equations, inequations and simultaneous equations. Graphical representation of linear relationships. • Measurement and Geometry: Surface area and volume of composite solids. Application of Pythagoras' Theorem and trigonometric ratios in contexts. Use of similarity and congruence of plane shapes. • Statistics and Probability: Represent data using diagrams for statistical analysis. Describe bivariate numerical data from scatterplots. Determine probabilities of a range of events. 	Financial arithmetic test	
		Linear relationships application task		
		Pythagoras and trigonometry test		
		Measurement test		
		Statistics application task		
		Geometry test		
		Probability test		
		<p>Year 10 Mainstream Mathematics</p> <ul style="list-style-type: none"> • Number and Algebra: Perform mathematical computations with surds. Application of the logarithm laws. Factorisation of a wide range of quadratic equations. Solving linear equations, inequations and simultaneous equations. Graphical representations of a variety of linear and non-linear relationships (parabolas, circles, hyperbolas). • Measurement and Geometry: Surface area and volume of a greater variety of composite solids. Applications of Pythagoras' Theorem and trigonometric ratios in contexts. Use of similarity and congruence of plane shapes. Apply angle and chord properties of circles. • Statistics and Probability: Represent data using diagrams for statistical analysis. Describe bivariate numerical data from scatterplots. Determine probabilities for a range of events using appropriate mathematical language. 	Linear relationships application task	
		Surds test

Years 7 - 10 Curriculum Overview 2020

		<p>VCE Foundation Mathematics Units 1 and 2</p> <p>These units provide for the continuing mathematical development of students entering VCE, who need mathematical skills to support their other VCE subjects, including VET studies, and do not intend to undertake unit 3 and 4 studies in VCE Mathematics in the following year.</p> <p>There is a strong emphasis on using mathematics in practical contexts relating to everyday life, recreation, work and study. The areas of study are space, shape and design, patterns and number, handling data, and measurement. Students are encouraged to use appropriate technology in all areas of their study.</p> <p>Students will:</p> <ol style="list-style-type: none"> 1. Confidently and competently use mathematical concepts and skills from the areas of study. 2. Apply and discuss mathematical procedures to solve problems in familiar and new contexts and communicate their results. <p>Select and use technology to apply mathematics in a range of practical contexts.</p>	Arithmetic test

		Interpreting bills test	
		Money application task	
		Travel application task	
		Income test	
		Measurement application task	
One semester (2) elective if student is undertaking Mainstream Mathematics		<p>VCE Mathematical Methods Unit 1 (Accelerated Study)</p> <p>In undertaking this unit, students are expected to be able to apply techniques, routines and processes involving rational and real arithmetic, sets, lists and tables, diagrams and geometric constructions, algebraic manipulation, equations, graphs and differentiation with and without the use of technology. They should have facility with relevant mental and by-hand approaches to estimation and computation. The use of numerical, graphical, geometric, symbolic and statistical functionality of technology for teaching and learning mathematics, for working mathematically, and in related assessment, is to be incorporated throughout the unit as applicable.</p> <p>The appropriate use of the TI-nspire CX CAS calculator will be used to support and develop the teaching and learning of mathematics throughout the course.</p> <p>Students will draw on knowledge and skills outlined in all the areas of study. On completion of this unit the student should be able to:</p> <ul style="list-style-type: none"> • Define and explain key concepts as specified in the content from the areas of study, and apply a range of related mathematical routines and procedures. • Apply mathematical processes in non-routine contexts, including situations requiring problem-solving, modelling or investigative techniques or approaches, and analyse and discuss these applications of mathematics. • Use numerical, graphical, symbolic and statistical functionalities of technology to develop mathematical ideas and produce results. 		<p>applicable.</p> <p>The appropriate use of the TI-nspire CX CAS calculator will be used to support and develop the teaching and learning of mathematics throughout the course.</p> <p>Students will draw on knowledge and skills outlined in all the areas of study. On completion of this unit the student should be able to:</p> <ul style="list-style-type: none"> Define and explain key concepts as specified in the selected content from the areas of study, and apply a range of related mathematical routines and procedures. Select and apply mathematical facts, concepts, models and techniques from the topics covered in the unit to investigate and analyse extended application problems in a range of contexts. Select and use numerical, graphical, symbolic and statistical functionalities of technology to develop mathematical ideas, produce results and carry out analysis in situations requiring problem-solving, modelling or investigative techniques or approaches. 	<p>Network test</p> <p>Financial arithmetic application task</p> <p>Investigating relationships between two numerical variables test</p>	
YEAR 10 Performing Arts	One semester elective	<p>Designing Drama</p> <p>This unit focuses on performance styles, character development and performance skills. Students work predominantly on self-devised group ensemble work that will be performed for an audience. Technical and physical skills are developed through a wide range of activities and workshops in class.</p> <p>Students enrich their understanding of Drama through research, observation, analysis and discussion of their own performances and that of peers. They increase their understanding of drama terminology, analysis skills and their understanding of a variety of performance styles.</p>	<ul style="list-style-type: none"> Introduction to eclectic performance styles Theatre practitioners Play-making techniques for ensemble performance works Play-making techniques for solo performance works 	<p>'Drama Practitioners Workshop'</p> <p>Ensemble Performance</p> <p>Solo Performance</p>
		<p>Music Group Performance and Composition</p> <p>Students will have the opportunity to create and perform in small and large ensembles. Students enrich their understanding of best performance and rehearsal techniques. Students will explore ways to compose music for their group and develop arranging skills. Students will also develop their musicianship skills through written and practical work.</p>	<ul style="list-style-type: none"> Best Practice: Rehearsal Techniques Musicianship Composition and Arrangement 	<p>Performances</p> <p>Musicianship</p> <p>Composition/Arrangement</p>
		<p>Music Solo Performance and Styles</p> <p>Students will have the opportunity to explore a variety of music genres in performance and through the analysis of compositions. Students will investigate a number of different genres of music from baroque to contemporary. They will investigate how society influenced the development of music. Students will</p>	<ul style="list-style-type: none"> Elements through time Performance skills Ensemble skills Musicianship 	<p>Group/Solo Performance</p> <p>Investigation and Analysis</p>

Years 7 - 10 Curriculum Overview 2020

		undertake and extended investigate in the style of their own choice. Students will complete a group performance and a solo recital and oral presentation focusing on a style of their choice.		Performance Recital
	One semester elective	<p>Live Production: (VET Taster)</p> <p>This course covers many facets of the live production industry: ticketing, seating, staging, lighting, make-up, set production, properties, occupational health and safety and industry knowledge. This course doesn't require students to perform.</p> <p>It is a practical, skills-based course that focuses on the stagecraft areas needed to 'stage a production'. As a part of the subject, this class will form the backstage crew for the OLMC Junior production 2020. Students will be responsible for running the sound and lights, stage management, design and advertising. They will also see a live performance to analyse in terms of the design and stagecraft elements.</p>	<p>Some of the skills you will develop are:</p> <ul style="list-style-type: none"> • Basic lighting skills and knowledge • Basic audio skills and knowledge • Analysis of live performance • Follow a design process • Basic prop construction • Work effectively with others • Occupational Health and Safety • Safe and ethical theatre practises 	Practical tasks and modules (ongoing throughout the semester)
YEAR 10 Religious Education	Whole year core	<p>Through the study of God, Religion and Life, students examine the nature and exercise of conscience, relating their experience to practical life choices.</p> <p>Scripture and Jesus: The students undertake an exploration of the Book of Exodus from the first testament, and make connections between the story of Moses and rituals in Judaism.</p> <p>Morality and Justice: students critique the value systems in contemporary Australian society, the reality of oppression and the Christian call to work for justice in the world. The value of each individual's potential to be involved in promoting justice is emphasized in this unit. Students are encouraged to identify ways in which individuals develop personal responsibility and moral maturity.</p> <p>Students study right relationships and human sexuality which are gifts from God through which can be lived out in the vocation of love.</p> <p>Students will then look at the Church and Community through a study of the Church in history. Students develop an awareness of the changing</p>	<ul style="list-style-type: none"> • Scripture and Jesus • Morality and Justice • Church and Community • Prayer, Liturgy and Sacraments 	Catholic Social Teaching Presentation

Years 7 - 10 Curriculum Overview 2020

		<p>Church.</p> <p>The students develop a greater understanding of the nature of Prayer, Liturgy and Sacraments through these celebrations. They prepare and participate in various expressions of private prayer and communal celebrations.</p> <p><i>Personal and Social Capability</i></p>		Wonderfully Made Task
YEAR 10 Science	Whole year core	<p>The Big Ideas of Science</p> <p>The Big Ideas of Science is designed to give a solid foundation in a range of Science disciplines and a pathway into each of the four VCE Science subjects. Students will explore the big ideas of each of the four Sciences in core units.</p> <p>Biology: focuses on the Science of genetics and evolution. Students will learn how information is passed on from generation to generation and investigate some of the ethical issues that have arisen in this area as technology has advanced in recent times.</p> <p><i>Ethical Capability</i></p> <p>Chemistry: students will unlock the power of the periodic table; exploring the extent to which it can be used as a tool to understand atomic structure and predict chemical bonding patterns as well as the properties of compounds formed.</p> <p>Psychology: students will learn about the fundamental process of scientific methodology by studying human behaviour. They will also investigate the various roles and responsibilities of psychologists in today's society. Concepts such as resilience will be explored.</p> <p>Physics: students will explore Newton's laws of motion. They will discover the Science behind every day phenomena that is taken for granted, including walking, cycling, driving and flying. Here again, students will utilise their knowledge of the scientific method to conduct a detailed investigation.</p>	<ul style="list-style-type: none"> • Biology • Chemistry • Physics • Psychology <p>In addition to these core topics, students will study two applied science topics that look at one area of science in more depth with a real world context. The application of this field and the ethics of the technology will be explored.</p>	<p>Topic Test</p> <p>Student Designed Investigations</p> <p>Research Tasks</p>
		<p>Enhanced Biology (Accelerated Study)</p> <p>Cells and Functioning Organisms: Just as life of a human begins with a single cell, so too does the life of all living things; plants, animals, bacteria and fungi all</p>	<p>This unit has been developed to incorporate the essential concepts from the current VCE Biologys Units 1 and 2 courses that best prepare students to accelerate their study</p>	<p>Topic Test</p>
	One unit elective This elective is a pre-requisite			

Years 7 - 10 Curriculum Overview 2020

	<p>for students wishing to undertake VCE Biology Units 3 and 4 in Year 11.</p>	<p>share this basic building block of life in common. In this unit, we will uncover why similarities and differences exist between humans and all other living things by investigating the inner-workings of the cell and the systems they make up in the body. We will also relate living organisms' requirements to how each individual cell grows, multiplies, functions and responds to its environment.</p>	<p>of Biology.</p> <p>Learning Outcomes</p> <ul style="list-style-type: none"> • Design, conduct and report on a practical investigation related to cellular structure, organisation and processes. • Explain the relationship between features and requirements of functioning. 	<p>Summary Reports</p> <hr/> <p>Student Designed Investigation</p>
